PRE QUALIFICATION DOCUMENTS		Doc. No.	UNITECH_08032016
DEPARTMENT	TRADING AND PROJECTS	Rev.	0
Title	QA-QC POLICY	Date	08/03/2016

PROJECT QUALITY POLICY

UNITECH TRADING is dedicated to providing the organization and commitment that will establish and execute a Quality Control Program as described in this manual. All Construction activities shall be performed according to the Quality Control Program, contract specifications and applicable codes. If a conflict occurs between the requirements of this Quality Control Program and the Contracts Documents, the latter shall take precedence.

The Contractor Senior Management fully supports the establishment and implementation of the Quality Control Program, with the understanding that “**Quality of Work**” is the primary responsibility of all contract employees, and that Quality Controls starts with each individual. The Quality Control Department will administer this program and shall be independent of on-site management personnel with the authority to identify nonconforming items, recommend dispositions and corrective action, and verify implementation of those recommendations.

When a nonconforming condition cannot be resolved between Project Management and Quality Control Department, the problem will be elevated to the attention of the Contractor Senior Management for resolution. The Quality Control Program may only be revised or modified by authorization of the Quality Control Department.
