

## Description

Orbit plug valve (general valve) is applicable to the cutting and connection of pipelines medium that are used in various industries such as petroleum, chemical industry, chemical fertilizer, power industry etc under nominal pressure of CLASS150-900LBS, and working temperature of  $-29^{\circ}\text{C}$  to  $180^{\circ}\text{C}$

### Features:

Reasonable structure, reliable sealing, excellent performance and beautiful appearance;

Sealing is realized by the sealing rings around the valve disc. It has unique protection of wallow-tailed sink and fixed sealing rings;

Characteristic double-direction flow makes installation and use more convenient;

The materials of the parts and sizes of flanges can be reasonably configured according to the actual operating condition of the requirements of the customize, so as to meet the various needs of engineering
