

Description

Foot valve is a kind of energy-saving valve to prevent medium in the pipe flow back to water source. There are many inlet holes and reinforcing ribs in the valve cover, so the pipe will not be easily clogged up. Moreover, Strainer improves the clearance in the medium, and prolong the life of valves and other equipments. So Foot Valve with Strainer is good choice for water supply.

Nominal Pressure(MPa): 1.0, 1.6

Sizes: DN50-300
